Apple Certified Technical Coordinator 10.7 Bootcamp

The Apple Certified Technical Coordinator (ACTC) 10.7 Boot Camp is a combined delivery of the [Lion 101](#) and [Lion 201](#) courses, along with the associated certification exams. This hands-on course provides an in-depth exploration of functionality and troubleshooting on OS X and the best methods for effectively supporting users of OS X systems.

This course also gives technical coordinators and entry-level system administrators the skills, tools, and knowledge to implement and maintain a network that uses OS X Server. Students learn how to install and configure OS X Server to provide network-based services, such as file sharing, authentication, and printing. Tools for efficiently managing and deploying OS X and software updates are also covered.

Course durations vary, so refer to the [Schedule](#) and contact your nearest Apple Authorized Training Center for details.

Who Should Attend

This course is designed for help desk specialists, technical coordinators, service technicians, and entry-level system administrators who implement and maintain networks using OS X Server or support Mac users, technical support personnel in businesses that use Macs for general productivity or creative design, and technical coordinators or power users who manage networks of computers running OS X — such as teachers and technology specialists who manage classroom networks or computer labs.

Prerequisites

- Basic OS X knowledge
- Basic troubleshooting experience
- Experience with OS X in a network environment
