

# Mac OS X Server Essentials 10.6 Sample Test

## To Register

This exam is offered at Apple Authorized Training Centers and Prometric Testing Centers worldwide. For information on exam registration, please visit [training.apple.com/certification](http://training.apple.com/certification).

To learn more about Apple training offerings that can help you prepare for certification, please visit [training.apple.com/courses](http://training.apple.com/courses).

The Mac OS X Server Essentials 10.6 Exam (Prometric exam no. 9L0-510) is a computer-based test offered at Apple Authorized Training Centers and Prometric Testing Centers.

The exam is one of two required exams in the Apple Certified Technical Coordinator (ACTC) 10.6 certification track. You must pass this exam and the Mac OS X Support Essentials 10.6 Exam to become an ACTC 10.6.

This Sample Test presents ten questions similar in style and content to those presented in the Mac OS X Server Essentials 10.6 Exam. Reviewing these Sample Test questions can familiarize you with the type of questions posed in the exam. Questions on the exam will vary in content and may be more or less difficult than these.

Please visit the Mac OS X Certifications page ([training.apple.com/certification/macosex](http://training.apple.com/certification/macosex)) and download the Mac OS X Server Essentials 10.6 Exam Skills Assessment Guide for a detailed description of the exam, including reference text title, learning objectives, number of questions, time limit, and required score.

To use this Sample Test, answer the questions below, then refer to the answer key at the end of this document. Please note that UNIX commands and processes are shown in `monospace` in this Sample Test and in the actual exam.
